

HAI presents:

# **Helicopter Maintenance Management Course at HELI-EXPO 2013**

This four-day course has two primary purposes for the manager in a maintenance organization. First, it gives managers critical, yet often overlooked skills to control a complex issue that confronts every organization: limited resources to accomplish its objectives. Second, the course reinforces the required technical proficiency that managers must maintain by offering an in-depth regulatory review.

At the conclusion of the course, attendees will —  
Understand what influences managers in a maintenance organization  
Learn management principles and techniques for managing people and controlling jobs  
Gain a better understanding of different types of costs and be able to identify areas for reduction of product and service costs  
Be aware of the importance of information systems  
Learn various aspects of financial management and accounting and their importance, and how to develop budgets  
Refresh their knowledge of relevant Federal Aviation Administration (FAA) regulations for maintenance record keeping; transfer of aircraft records; traceability requirements of parts; FAA aircraft certification; FAA inspection authorization renewal, and international certification issues.  
Registration is available at

## Event Details

**Fri, Mar 1, 2013 - 8:00 am**  
**Las Vegas Convention Center**  
3150 Paradise Road  
Las Vegas, NV 89109
